

DRaaS with Veeam: Offering a Range of Solutions

Sky Data Vault with Veeam provides versatile data protection solutions, including BaaS, DRaaS, and CDP, tailored to your specific backup and recovery requirements. Whether you use them individually, or in combination to meet your organization's requirements, each solution has its own benefits and use cases.

DRaaS w/Veeam

This service allows your organization to recover data, applications, and entire server instances from a disaster; including power outages, hardware failure, cyberattack, or natural disasters. Your organization's data and applications replicate to the secure SDV Cloud. As a managed service, you can have full confidence in the ability to recover your data without the headache of monitoring, managing, and maintaining the service on a day-to-day basis. This service also includes all Egress Fees, free annual testing, and free 30-day hosting! With SDV DRaaS w/Veeam, you can enjoy the following benefits:

- Ensure your business continuity and availability by minimizing your downtime and data loss in the event of a disaster.
- Reduce your disaster recovery costs and complexity by eliminating the need for a secondary data center and internal day-to-day management.
- Enhance your disaster recovery security and compliance by encrypting your data in transit and at rest, and by using the secure SDV Cloud that meets your regulatory requirements.
- Have a transparent, flat monthly fee that includes all the services you require to ensure your budget stays intact!

BENEFIT	BaaS	DRaaS	CDP
File and folder lever recovery	X	X	X
Server level recovery		X	X
Sub 30 minute spin up of last backup		X	X
Realtime backup			X
Bare metal recovery		X	X

FREE Egress	X	X	X
24x7x365 US Based Support	X	X	X
Critical applications and fast recovery		X	X

Sky Data Vault can assign different services to different customer servers to support the application correctly.

USE CASE: You should use SDV DRaaS w/Veeam if you want to recover your data and applications from a disaster, without sacrificing performance, security, or flexibility. Veeam DRaaS is ideal for enterprises with critical workloads requiring high availability and low recovery time objectives (RTOs) and recovery point objectives (RPOs).
